MESSAGE FROM THE DIVISION DIRECTOR

What is the SPOR (Strategy for Patient-Oriented Research) Network in Diabetes and its Related Complications and what are the benefits for the U of T Division of Endocrinology?

On March 31st 2016 Federal Health Minister Jane Philpott announced funding from the Canadian Institutes for Health Research (CIHR) for five SPOR Networks in Chronic Disease. I will lead one of these five networks, a SPOR Network in Diabetes and its Related Complications, along with my colleague Jean-Pierre Després, Scientific Director of the Cardiology Division of the Quebec Heart and Lung institute, Director of Science and Innovation at Alliance santé Québec and a Professor of Kinesiology at Université Laval. Each SPOR Network will receive \$12.45-million from CIHR over the next 5 years, matched by funding we raised from various partners. The SPOR Network in Diabetes and its Related Complications has partnered with the Canadian Diabetes Association, JDRF, the Michael Smith Foundation for Health Research, Research Manitoba, Alliance santé Québec, New Brunswick Health Research Foundation, as well as private sector contributors including Merck Canada Inc., Astra-Zeneca Inc., Caprion Proteome Inc., and WinSanTor Inc., for a total five-year investment of an additional \$19-million (total funding is now over \$31-million and rising as more partners join our Network). The Network will be administered by the University of Toronto, Faculty of Medicine, Department of Medicine (my home department) and its administrative offices will be on the 12th floor East of TGH alongside the BBDC administrative offices. The SPOR Network will be administered as a separate organization from the BBDC but will interact with the BBDC, each pulling the other forward in its slipstream to support diabetes research at U of T and elsewhere. I am very grateful to Professor Catharine Whiteside, former Dean of the U of T Faculty of Medicine, who has kindly agreed to be the first Executive Director of the Network. The other partner organizations are Université de Sherbrooke, Université Laval, Université de Montréal, University of Alberta, University of British Columbia, University of Manitoba, and the University of New Brunswick. The plan for the network is to create a new, sustainable, national diabetes research network beyond the 5 year CIHR funding term.

Our Network will facilitate meaningful connections between primary healthcare providers, their patients and relevant specialists to achieve improved care and significant cost savings within our health system. A focus for the Network will be the impact diabetes has on vulnerable groups, including Indigenous peoples, immigrants, women and lower socio-economic groups. Many members of the U of T Endocrinology division are team members of the Diabetes Network and will be actively involved in its research and KT activities. Others may be involved in some of the other funded SPOR networks, in particular the Chronic Kidney Disease Network headed by Dr. Adeera Levin at UBC. The Diabetes Network's activities are extensive and include clinical trials, informatics, development of new tools and therapies for diabetes complications, knowledge translation and training, to mention just some of the planned activities. For example we will create Canada's first comprehensive, consolidated, national diabetes registry that includes clinical and sociodemographic data from primary and specialty care settings, health systems administrative data, and social data. The creation of this registry will facilitate study of the epidemiology of diabetes and its complications, as well as identification and invitation of potential study participants for pragmatic clinical trials. We will impact diabetes-related blindness by funding a pan-Canadian Diabetic Retinopathy Early Intervention Group that will integrate their individual programs in various provinces into a single, interactive and sustainable tele-ophthalmology screening network using standardized infrastructure and procedures. Patients screened in the above programs will have genome-wide genotyping and sequencing to identify genetic variations associated with known risk factors for diabetes complications. Members of our Network have developed an automated, portable artificial pancreas (AP) using leading-edge insulin pump technology. Within our SPOR Network, we aim to conduct the clinical trials necessary to commercialize single-hormone and dual-hormone APs. Much of our work will focus on targeted Intervention of diabetic

complications, testing new therapies, imaging techniques and repurposing of approved therapies.

In summary, U of T leadership of the SPOR Network for Diabetes and its Related Complications will undoubtedly provide a major boost for members of our division involved in many facets of diabetes research, not least of which will be the many opportunities that will arise from national and international networking partnerships and collaborations.

Gary Lewis, Director, U of T Division of Endocrinology and Metabolism

HONORS AND AWARDS ANNOUNCED IN THE PAST 6 MONTHS (SINCE FALL 2015 NEWSLETTER)

Promotion to Full Professor

Cathy Kelly

Promotion to Associate Professor

Catherine Yu

Teaching/Education Awards:

Rene Wong is the 2014-2015 recipient of Continuing Professional Development, Faculty of Medicine's David Fear Fellowship

Dina Reiss – Received an Award of Excellence from Bridgepoint Hospital in Feb 2016 for commitment to patient care and teaching

Special recognition for Research:

Caroline Kramer – recipient of a Diabetes Junior Investigator Award from the Canadian Society of Endocrinology and Metabolism (CSEM), 2015

Andrew Advani is the recipient of the 2015 CSEM Charles Hollenberg Young Investigator Award

RESEARCH GRANTS

Canadian Diabetes Association Operating Competition September 2016

Gary Lewis, CDA Operating Grant, 2016 – 2018, CNS-mediated effects of insulin, glucagon, and GLP-1 in the regulation of hepatic glucose production in humans

Tony Lam, CDA Operating Grant, 2016 – 2018, Insulin and leptin action

Bruce Perkins, CDA Operating Grant, 2016-2018, Alleviating carbohydrate-counting burden in type 1 diabetes using artificial pancreas and sodium glucose-linked transporter 2 inhibition: A randomized placebo-controlled trial

Ravi Retnakaran, CDA Operating Grant, 2016 – 2018, Liver fat and the early pathophysiology of type 2 diabetes in women with recent gestational diabetes

Dan Winer, CDA Operating Grant, 2016 – 2018, Mechanisms of B Lymphocyte Dysregulation in Insulin Resistance

DIVISION MEMBER PROFILE – Dr. Dina Reiss, Bridgepoint Hospital

Dina Reiss received her medical degree from Chicago Medical School, Chicago Illinois in 2008. She then went on to complete her General Internal Medicine training at Massachusetts General Hospital in Boston. Subsequently, she moved to Toronto to complete her fellowship in Endocrinology & Metabolism in 2013. She has also completed University of Toronto's Master Teacher Program in 2014.

After Endocrinology fellowship, she joined Bridgepoint Hospital to create a novel combined Internal Medicine and Endocrine consult service. During this time she also created a diabetes clinic servicing patients at Bridgepoint and in the surrounding community. This clinic is staffed by Dina, a diabetic nurse educator and dietitian. She also created a separate clinic which is meant to help transition complex inpatients at the hospital to the community setting. In this clinic she sees a variety of patients typically with multiple medical co-morbidities. An example would be a senior patient recently hospitalized at Bridgepoint for orthopedic rehab who in addition suffers from multiple ailments (such as: hypertension, diabetes and congestive heart failure). Many such patients do not have adequate follow up with a family physician or subspecialist after discharge and the clinic functions as a 'bridge' until they acquire appropriate care.

When Bridgepoint and Mount Sinai Hospital amalgamated last year, Dina saw an opportunity to broaden the experience of residents doing their Internal Medicine rotation at Mt. Sinai. She began a program that saw residents visit Bridgepoint for up to a week of their Internal Medicine Consult rotation. Additionally, she has had Endocrinology fellows rotate through the diabetes clinic she created. For her commitment to teaching as well as patient care, she has recently won the Award of Excellence from Bridgepoint (February 2016).

In her spare time Dina likes to stay active jogging with Gunter her eleven month old German shepherd and Fiancée Afshin. She is also an avid swimmer and frequently swims long distances in local lakes during the summer months. Otherwise, she enjoys traveling and hiking. She has lived in 4 different countries: USA, Israel, England and Canada and considers Toronto her home. She hopes to travel to Hawaii later this year. Here is a picture of Dina and Gunter during a hike.
