

Summary of Teaching Activities

For the last 21 years, in a typical year, I attend for 16 weeks on the in-patient Thromboembolism consult service, with supervision of subspecialty haematology trainees and fellows and a variable number of elective general internal medicine trainees, and pharmacy residents. From 2000 until I assumed responsibility for ITM in 2018 I also attended on the in-patient haematology consult service for 8-12 weeks, with supervision of general internal medicine trainees and subspecialty haematology trainees and fellows. I see patients in clinic for six half-days per week, and have a resident or subspecialty trainee with me for three of these clinics each week.

Prior to 2021, I provided on average 10 hours per year of formal teaching on obstetric haematology and thrombosis to subspecialty trainees during their Academic Half Day in Medical Oncology, Gynaecologic Oncology, Obstetrics and Gynaecology, and the year four internal medicine program.

I also lecture for the Masters programs in Genetic Counselling and Teratology.

I am Foundations Director for the MD program for Year 1, in which position I supervise curriculum delivery and development and student assessment and course evaluation for the first year of the MD program, and, with the Year 2 Director, oversee the first two years of the program. I also serve as the course director for Introduction to Medicine, and as week lead for the Integration week (week 11, Introduction to Medicine) and Haematology weeks (weeks 16 and 17, Concepts, Patients, and Communities 1). In addition, each year, I deliver six lectures per year to Foundations students on Thinking Like a Doctor and haematology topics.

In the past, I delivered 3-5 hours on average of continuing education lectures each year.

	Undergraduate MD	Temerty Faculty of Medicine MD Program	Lecture	1	256	3.95
		Temerty Faculty of Medicine MD Program	Lecture	1	256	4.32
2010-2011	Postgraduate MD	Faculty of Medicine, Department of Medicine, General Internal Medicine	Clinical supervision			4.37
2009-2010	Postgraduate MD	Faculty of Medicine, Department of Medicine, General Internal Medicine	Clinical supervision			4.48

2009-2010	Postgraduate MD	Faculty of Medicine, Department of Medicine, General Internal Medicine	Clinical supervision		4.28
2008-2009	Postgraduate MD	Faculty of Medicine, Department of Medicine, General Internal Medicine	Clinical supervision		4.23
2007-2008	Postgraduate MD	Faculty of Medicine, Department of Medicine, General Internal Medicine	Clinical supervision		4.21
2007-2008	Postgraduate MD	Faculty of Medicine, Department of Medicine, General Internal Medicine	Clinical supervision		4.29
2006-2007	Postgraduate MD	Faculty of Medicine, Department of Medicine, General Internal Medicine	Clinical supervision		4.17
2006-2007	Postgraduate MD	Faculty of Medicine, Department of Medicine, General Internal Medicine	Clinical supervision		4.88
2005-2006	Postgraduate MD	Faculty of Medicine, Department of Medicine, General Internal Medicine	Clinical supervision		4.13
2005-2006	Postgraduate MD	Faculty of Medicine, Department of Medicine, General Internal Medicine	Clinical supervision		4.13
2004-2005	Postgraduate MD	Faculty of Medicine, Department of Medicine, General Internal Medicine	Clinical supervision		4.74
2004-2005	Postgraduate MD	Faculty of Medicine, Department of Medicine, General Internal Medicine	Clinical supervision		4.33
2004-2005	Postgraduate MD	Faculty of Medicine, Department of Medicine, General Internal Medicine	Clinical supervision		4.74
2003-2004	Postgraduate MD	Faculty of Medicine, Department of Medicine, General Internal Medicine	Clinical supervision		4.51

Summary of Teaching Activities

Martina Trinkaus

***Division of Haematology, Department of Medicine
UNIVERSITY OF TORONTO***

For the last 8 years, in a typical year, I attend for 10 weeks on the hematology consult service and 2 to 4 weeks on the in-patient hematology ward (when our ward internist is away). Supervision includes general medicine trainees (two to four), elective trainees (one to two) and hematology residents who act as a junior attending during specific months of the year. I see patients in 4 to 5 half day clinics per week. One clinic is devoted to bone marrow biopsy and lumbar puncture procedures with one PGY1 to PGY3 trainee performing all procedures (up to 4 per clinic) under my supervision each week. In each ambulatory clinic I supervise one hematology fellow, one GIM trainee or elective resident, and at times a family medicine resident or LINC medical student (2 per year). My practice has grown considerably since 2010 such that in 2016 I consulted on more than 500 new patients, thereby giving trainees an excellent informal learning opportunity around each patient case.

On an annual basis, formal teaching outside of the consult service or ambulatory clinic environment includes:

- 2 hours of formal teaching per rotation to GIM trainees rotating on the St. Michael's Hospital (SMH) hematology service (26 hours total)
- 3 hours of formal teaching for PGY1 and PGY2 GIM academic half days
- 3 hours presenting at SMH GIM noon rounds
- 4 hours to SMH and Mount Sinai Hospital family medicine academic half days
- 9 hours for the Adult Hematology training program Academic Half Days
- 6 hours for royal college OSCE practice scenarios with PGY5 hematology trainees
- 8 hours for OSCE practice scenarios with the National Hematology Retreat (PGY5 and PGY6 trainees)
- 10 hours of chemotherapy workshop teaching to PGY4 and PGY5 Adult Hematology Residents (as of 2017)
- Clerkship teaching: I am a clerkship preceptor for one student each year on the GIM rotation and moderate one Portfolio group on a q 2 yearly basis (8 to 10 hours/ year).

I deliver up to 15 hours of continuing education lectures each year, including presentations at medical conferences, presentations for allied health care programs (i.e. Cancer Care Ontario Pharmacy series), and nursing events. Annually I plan a three day National Hematology retreat for 80 Canadian

hematology trainees each July (which includes a written, oral, and hematopathology exam, and workshops). I have developed the annual Consultative Non-Neoplastic Hematology Program (now in its second year), and participate on the planning committee of numerous conferences on a yearly basis (i.e. Leukemia Day, Canadian Hematology Conference).

Notes:

1. Teaching Evaluation Scores are to be manually completed by the faculty member (if applicable).
2. Total Number of Students column contains sum of students in a specific year for a particular Type of Teaching Activity. The number is not necessarily unique.
3. Total Hours column uses prorated values for an activity that spans multiple academic years.
